

Taste of New Orleans 2019 Encore Symposiums: January 28-31, 2019
Learner Assessment and Program Evaluation

Name: _____

AANA ID#: _____

Indicate your level of achievement for each learner objective on the rating scale.

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

Rating
1 to 5

Lecture 01 - Ethics and Legal Considerations in the Peri-anesthetic Environment - M. Talon

- State current controversial topics in patient care.
- Discuss case scenarios.
- Develop a collaborative plausible approach to deal with ethical scenarios.
- State common ethical and legal terms.
- Overall rating of topic and facilitator during this lecture.

Lecture 02 - Innovations in Hemodynamic Monitoring and Recent Advancements in Technology - M. Talon

- State the advantages and disadvantages of arterial hemodynamic measurements including volume calculations.
- Discuss the concepts of volume management vs. pressure management for volume resuscitation.
- Discuss the utilization of pulses pressure and stroke volume variations in identifying volume issues with patients.
- Discuss the new concepts and methodologies in monitoring hemodynamic changes.
- Overall rating of topic and facilitator during this lecture.

Lecture 03 - Aviation and Anesthesia - M. Zinder

- Discuss the different comparisons between aviation and anesthesia.
- Describe how to apply the steps for safety taken in aviation and apply them to anesthesia.
- Describe how to use checklists to ensure safety in the OR.
- Overall rating of topic and facilitator during this lecture.

Lecture 04 - Pharmacogenetics and Personalized Anesthesia - P. Strube

- List and identify genetic based interventions to deliver personalized anesthesia care.
- Overall rating of topic and facilitator during this lecture.

Lecture 05 - Illegal Drugs and the Impact on Anesthesia - P. Strube

- List and identify current illegal drugs impacting clinical practice.
- List and identify techniques for caring for the patient on illegal drugs under anesthesia.
- Overall rating of topic and facilitator during this lecture.

Lecture 06 - Bonus Credit: Techniques of Epidural Anesthesia - C. Reese

- Describe the anatomy, equipment, and techniques of epidural anesthesia.
- Overall rating of topic and facilitator during this lecture.

Indicate your level of achievement for each learner objective on the rating scale.

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

Rating 1 to 5

Lecture 07 - Surgical Positioning: Considerations for the Anesthesia Provider - M. Zinder

Identify the role and responsibility of the anesthesia provider in patient positioning.
Describe the complications associated with improper patient positioning.
Describe the physiological changes that occur with the various positions.
Overall rating of topic and facilitator during this lecture.

Lecture 08 - The Business of Anesthesia - M. Zinder

Describe the concept of meaningful use.
Explain your understanding of the PQRS system.
Describe the current state of the ICD-10.
Identify the building blocks of an independent anesthesia practice.
Overall rating of topic and facilitator during this lecture.

Lecture 09 - Malignant Hyperthermia: Do You Really Know Everything? - M. Talon

Explain the pathophysiology of Malignant Hyperthermia.
State those patients at risk.
Discuss possible links to other disorders.
Discuss newer information related to Malignant Hyperthermia and non-anesthesia related conditions that may or may not be associated with Malignant Hyperthermia.
Overall rating of topic and facilitator during this lecture.

Lecture 10 - Clinical Conundrums of Epidural Anesthesia - C. Reese

Discuss the causes of clinical misadventures associated with epidural anesthesia.
Overall rating of topic and facilitator during this lecture.

Lecture 11 - Dogma, Traditions and What is the Evidence? - P. Strube

List and identify what evidence either supports or disproves both dogmas and traditions in anesthesia practice.
Overall rating of topic and facilitator during this lecture.

Lecture 12 - Bonus Credit: Opioid Free, Crazy or Bold? - P. Strube

List and identify techniques to limit or eliminate narcotics from the care of the anesthesia patient.
Overall rating of topic and facilitator during this lecture.

Lecture 13 - Patient Satisfaction with Dashboard and Metrics - P. Strube

List and identify techniques for improving patient satisfaction scores.
List and identify a clear understanding how to interpret dashboards and metrics.
Overall rating of topic and facilitator during this lecture.

Lecture 14 - Locals, Lipids and Beyond - P. Strube

List and identify correct pharmacology interventions for using lipids for toxic events.
List and identify alternative uses of lipid rescue techniques.
Overall rating of topic and facilitator during this lecture.

Indicate your level of achievement for each learner objective on the rating scale.

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

Rating 1 to 5

Lecture 15 - Introduction to the Use of Ultrasound Guided Regional Anesthesia - C. Reese

Describe the use of ultrasound technology in the recognition of anatomical structures and performance of peripheral nerve blocks.

Overall rating of topic and facilitator during this lecture.

Lecture 16 - The Power of the Placebo - M. Zinder

List the uses of the placebo and how it relates to patient outcomes.

Overall rating of topic and facilitator during this lecture.

Lecture 17 - Pharmacology for Acute Pain Management and Pediatric Sedation: Broadening your Choices - M. Talon

Explain the pharmacological prevention and management of tolerance and hyperalgesia.

Discuss the pharmacological choices in pediatric sedation.

State the alternate routes of medication administration.

Overall rating of topic and facilitator during this lecture.

Lecture 18 - Bonus Credit: NBCRNA / CPC (Continued Professional Certification) Update

Describe anesthesia credentialing and current trends in continued competence.

Describe the background and rationale for the CPC program for nurse anesthetists.

List the components of the NBCRNA CPC program for nurse anesthetists.

Describe the timeline for implementation of the NBCRNA CPC program for nurse anesthetists.

Overall rating of topic and facilitator during this lecture.

Lecture 19 - Pediatric Burns: Dealing with Extreme Airways, Facial Scars and More - M. Talon

Review the anatomical differences with pediatric airways.

Discuss the use of Mallampati thyromental distance in evaluation of the airway.

Discuss the predictors of difficult mask ventilation and difficult laryngoscopy.

Discuss the pros and cons of preoperative sedation.

Discuss methods for induction and maintenance of anesthesia.

Compare methods for securing the airway and preparing for extubation.

Overall rating of topic and facilitator during this lecture.

Lecture 20 - PTSD and How it Affects us as Anesthesia Providers - M. Zinder

Describe how a patient with PTSD affects how their anesthetic is performed and its possible outcomes.

Overall rating of topic and facilitator during this lecture.

Lecture 21 - Stress Management for Healthcare Providers - M. Zinder

Describe the effects of stress on emotional and physiological health.

State definitions of stress.

Identify and describe strategies for decreasing stress and management techniques.

Overall rating of topic and facilitator during this lecture.

Indicate your level of achievement for each learner objective on the rating scale.

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

Rating 1 to 5

Lecture 22 - An Approach to Dosing the Obstetric Epidural - C. Reese

Discuss the pharmacology and clinical use of various local anesthetic and adjunct drugs for obstetric epidural anesthesia.

Overall rating of topic and facilitator during this lecture.

Lecture 23 - Obstetric Epidural: When Bad Things Happen - C. Reese

Describe the importance of sterile technique and timely recognition of systemic infection with epidural anesthesia.

Overall rating of topic and facilitator during this lecture.

Overall Assessment

Indicate your level of achievement for each statement on the rating scale.

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

Rating 1 to 5

The facilitators were effective in presenting the material.

--

Teaching methods were effective.

--

The program content was related to the objectives.

--

My personal learning objectives were met.

--

Physical facilities facilitated learning.

--

State one item you learned that will improve your nurse anesthesia practice.

State any barriers to implement this change.

What future topics would you like presented?
