

**Charleston Harbor-Front Sanctuary 2020: June 8-11, 2020  
Learner Assessment and Program Evaluation**

**Name:** \_\_\_\_\_

**AANA ID#:** \_\_\_\_\_

**Indicate your level of achievement for each learner objective on the rating scale.**

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

<b>Rating 1 to 5</b>
--------------------------

**Lecture 01 & 02 - Pharmacology: Review of Basic Pharmacology - T. Wicks**

- Compare and contrast Phase I and Phase II metabolic drug reactions.
- Discuss the factors influencing drug uptake and distribution of drugs.
- Describe the influence of ionization and pKa on drug distribution.
- Discuss the characteristics of a simple 3 compartment pharmacokinetic model.
- Compare and contrast elimination half time and context sensitive half time.
- Compare and contrast ligand gated, voltage gated, and G protein gated ion channels.
- Discuss the factors influencing Minimum Alveolar Concentration.
- Overall rating of topic and facilitator during this lecture.

**Lecture 03 - Technology in Anesthesia; Past, Present and Future - T. Davis**

- Describe the equipment used and relative risk for administering open drip ether.
- Identify two examples of the use of technology to augment current anesthesia practice.
- Speculate on the use of technology to create an ideal environment for patients 20 years in the future.
- Overall rating of topic and facilitator during this lecture.

**Lecture 04 - Breathe.... Select Airway Emergencies, Best Evidence - W. Howie**

- Identify best practices, as highlighted in the difficult airway algorithm, to employ when confronted with select airway emergencies.
- Describe how to recognize and respond to airway management complications in accordance with evidence-based practices.
- Delineate preventative strategies to avoid select airway emergencies.
- Overall rating of topic and facilitator during this lecture.

**Lecture 05 & 06 - How to Respond to an Initial Claim or Law Suit - J. Martemucci, Esq**

- Discuss the proper steps to take upon receipt of a claim or lawsuit, including communications with risk management, if available, and the relevant insurance company.
- Describe the necessary and proper communications with their legal counsel.
- Overall rating of topic and facilitator during this lecture.

**Lecture 07 - Can't Intubate, Can't Ventilate.... What Now? - W. Howie**

- Employ an evidence-based airway algorithm when confronted with a "can't intubate, can't ventilate" scenario.
- Describe best practice airway assessment principles to help predict potential "cannot ventilate, cannot intubate" situations.
- Demonstrate appropriate steps to perform a cricothyrotomy when challenged with a "cannot ventilate, cannot intubate" situation.
- Overall rating of topic and facilitator during this lecture.

Indicate your level of achievement for each learner objective on the rating scale.

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

Rating 1 to 5
------------------

**Lecture 08 - Flail Chest: Why is there an Elephant on My Chest? - W. Howie**

Describe the physiological and pathophysiologic implications of a traumatically induced “flail chest”.

Describe key factors regarding intraoperative management of a patient with a “flail chest”.

Discuss the current best practice multimodal (opioid limiting) pain management strategies to include NMDA receptor drugs, NSAIDS, regional anesthesia, alpha 2 agonists, acetaminophen, and the like while caring for a patient with a traumatically induced “flail chest”.

Overall rating of topic and facilitator during this lecture.

**Lecture 09 - Preparing for Your Deposition and Answers to Written Requests with Your Attorney -**

**J. Martemucci, Esq**

Describe the standard written discovery process of professional negligence claims and how to work with their attorney.

Explain the importance of oral deposition testimony, how to prepare, and the rules of the road.

Overall rating of topic and facilitator during this lecture.

**Lecture 10 - Anesthesia Potpourri: Dispelling Myths and Other Interesting Facts - T. Davis**

Appreciate pharmacogenetics and the implication to anesthetic requirement.

Support the requirement for reversal of neuromuscular blockade on every patient.

Discuss the effectiveness of cricoid pressure in reducing aspiration.

Overall rating of topic and facilitator during this lecture.

**Lecture 11 - The Pharmacology and Toxicology of Local Anesthetics - T. Wicks**

Discuss the factors influencing the potency of local anesthetic agents.

Compare and contrast the metabolic pathways of ester and amide based local anesthetics.

Describe the symptoms and treatment of local anesthetic toxicity.

Overall rating of topic and facilitator during this lecture.

**Lecture 12 - Review of Neuromuscular Blockade Pharmacology - T. Wicks**

Describe the physiologic events of neuromuscular transmission.

Compare and contrast the characteristics of depolarizing and non-depolarizing neuromuscular blockade.

Discuss monitoring and antagonism of neuromuscular blockade.

Overall rating of topic and facilitator during this lecture.

**Lecture 13 - Pharmacology: The Oldies and the Goodies - W. Howie**

Identify the anesthetic implications and best practice application of principles of pharmacology.

Discuss how application of best practice pharmacologic principles can be used to minimize patient adverse effect.

Identify how to recognize and treat adverse effects of related to administration of common anesthetic agents to include: induction agents; inhaled agents; local anesthetics; and antifibrinolytics.

Overall rating of topic and facilitator during this lecture.

**Lecture 14 - Mentoring: Build Your Team from Within - T. Davis**

Correlate the importance of professional development to the creation of a preferred workplace.

State two elements of a mentoring relationship.

List two activities that will build trust between the mentor and the mentee.

Overall rating of topic and facilitator during this lecture.

Indicate your level of achievement for each learner objective on the rating scale.

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

Rating 1 to 5
------------------

**Lecture 15 - Hold the Show: Eliminate Drama and Enhance Communication - T. Davis**

Explain the link between Think-Feel-Say/do-Results.

Describe the amygdala hijack and the Drama triangle.

Discuss the importance of creating a safe environment for the free flow of thoughts.

Overall rating of topic and facilitator during this lecture.

**Lecture 16 & 17 - How to Prepare for and Testify at a Hearing or Trial - J. Martemucci, Esq**

Describe the nuances and importance of trial preparation.

Explain how to testify in an honest, like-able and compelling manner.

Overall rating of topic and facilitator during this lecture.

**Lecture 18 - Bonus Credit: NBCRNA / CPC (Continued Professional Certification) Update - T. Wicks**

Describe anesthesia credentialing and current trends in continued competence.

Describe the background and rationale for the CPC program for nurse anesthetists.

List the components of the NBCRNA CPC program for nurse anesthetists.

Describe the timeline for implementation of the NBCRNA CPC program for nurse anesthetists.

Overall rating of topic and facilitator during this lecture.

**Lecture 19 - Select Anesthetic Emergencies: Pathophysiology and Best Practice Recommendations - W. Howie**

Discuss how to best avoid pulmonary aspiration using select H2 blockers and antacids, appropriate dosing of neuromuscular blocking agents consistent with evidence-based practices.

Discuss the anesthetic implications of Obstructive Sleep Apnea Syndrome in accordance with current best practices.

Discuss anaphylaxis pathophysiology and optimal pharmacologic management (Epinephrine/H1 and H2 agents/steroids/beta 2 agonists) and manage the anesthetic with care in accordance with current evidence-based practices.

Overall rating of topic and facilitator during this lecture.

**Lecture 20 & 21 - Review of the Physiology and Pharmacology of Coagulation, Hematologic Disorders, and Blood Component Administration - T. Wicks**

Discuss the components and steps of normal hemostasis.

Describe the role the coagulation cascade in limiting the scope of coagulation.

Compare and contrast the pathophysiology and pharmacological preparation of patients with hemophilia A & B, and von Willibrand disease.

Compare and contrast the pathophysiologic and pharmacological implications of type I and type II heparin induced thrombocytopenia.

List the common disorders of hypercoagulability.

Describe the common complication associated with blood product administration.

Overall rating of topic and facilitator during this lecture.

**Lecture 22 - Geriatric Pharmacology: Senior Citizens Have Senior Needs - W. Howie**

Discuss how best practice pharmacologic principles are applied to the geriatric patient.

Identify the anesthetic implications of administration of pharmacological agents to the geriatric patient.

Identify anesthetic implications and treat adverse effects related to geriatric pharmacology.

Overall rating of topic and facilitator during this lecture.

**Indicate your level of achievement for each learner objective on the rating scale.**

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

<b>Rating 1 to 5</b>
--------------------------

**Lecture 23 - Patient Safety: Achieving Zero Defects - T. Davis**

List two common root causes of patient injury.

Discuss how lessons learned from the aviation industry can improve patient safety.

Develop a personal commitment to connect with and protect each individual patient.

Overall rating of topic and facilitator during this lecture.

**Lecture 24 - Social Media in Anesthesia: Advantages and Dangers - T. Davis**

Appreciate uses of mobile devices to improve communication among staff and with patients.

Describe the use of apps to provide real time information and improve patient care.

List two risks created by the use of mobile devices while doing patient care.

Overall rating of topic and facilitator during this lecture.

**Overall Assessment**

**Indicate your level of achievement for each statement on the rating scale.**

Rate on the following scale: 1=Poor, 2=Below Average, 3=Average, 4=Above Average, 5=Excellent

<b>Rating 1 to 5</b>
--------------------------

The facilitators were effective in presenting the material.

--

Teaching methods were effective.

--

The program content was related to the objectives.

--

My personal learning objectives were met.

--

Physical facilities facilitated learning.

--

**State one item you learned that will improve your nurse anesthesia practice.**

---

---

---

**State any barriers to implement this change.**

---

---

---

**What future topics would you like presented?**

---

---

---
