

Encore Symposiums' Palm Springs' Oasis in the Desert: February 17 - 20, 2016

Learner Assessment and Program Evaluation

Name: _____

AANA ID#: _____

Indicate your level of achievement for each objective.

Rate on the following scale: 5 = excellent, 4 = Above Average, 3 = Average, 2 = Below Average, 1 = Poor

Rating
5 to 1

Lecture 01 - *Introduction to Difficult Airway - C. Frederick

Describe three critical ongoing problems in airway management.

Discuss the limitations to our current assessments of the airway.

Describe four quick assessments of which suggest possible difficulty in all available types of airway management.

Overall rating of topic and facilitator during this lecture.

Lecture 02 - *Extubation: Common Risks and Complications - C. Frederick

Review the risks associated with tracheal extubation.

Review the common causes of post-operative ventilatory failure.

Discuss the increased extubation risk associated with OSA and residual paralysis.

Overall rating of topic and facilitator during this lecture.

Lecture 03 - */*The Impact of the Affordable Care Act on Anesthesia Practice - K. Westra

List the key provisions of the ACA impacting anesthesia care and reimbursement payments.

Define the importance of anesthesia process and outcome measurements in physician quality reporting systems (PQRS).

Describe the Role of the nurse anesthetist and Anesthesia Care Team in ACA implementing process improvement initiatives.

Overall rating of topic and facilitator during this lecture.

Lecture 04 - */*Medical Malpractice: Plaintiff's Perspective - K. Miller

Discuss those conditions that result in malpractice accusations against nurse anesthetists.

Overall rating of topic and facilitator during this lecture.

Lecture 05 - */*Medical Malpractice: Defendant's Perspective - K. Miller

Review malpractice cases from the nurse anesthetists' prospective including the answering of the complaint and their role in the litigation.

Overall rating of topic and facilitator during this lecture.

Lecture 06 - NBCRNA Continued Professional Certification (CPC) Program Presentation - M. Wonjakowski

Describe anesthesia credentialing and current trends in continued competence.

Describe the background and rationale for the CPC program for nurse anesthetists.

Describe the components of the NBCRNA CPC program for nurse anesthetists.

Describe the timeline for implementation of the NBCRNA CPC program for nurse anesthetists.

Overall rating of topic and facilitator during this lecture.

Rate on the following scale: 5 = excellent, 4 = Above Average, 3 = Average, 2 = Below Average, 1 = Poor

5 to 1

Lecture 07 & 08 - **New Acute Pain Management Strategies I & II : Narcotic Sparing Techniques - C. Frederick

Identify the continuing challenges in post op pain management.

Describe the newer concepts of the complex biochemistry involved in pain transmission.

Discuss existing data supporting practice challenges: "Preventive analgesia", Multimodal therapy.

Identify system changes which might diminish narcotic use in surgical patients.

Overall rating of topic and facilitator during this lecture.

Lecture 09 - */*What Every CRNA Should Know About Medical Malpractice - K. Miller

Develop a perspective from a malpractice lawyer's view to minimize/avoid malpractice claims.

Develop a perspective from an insurance adjuster's view to minimize/avoid malpractice claims.

Overall rating of topic and facilitator during this lecture.

Lecture 10 - */*Discussion of an Actual Law Suit Involving a Nurse Anesthetist - K. Miller

Describe an overview of the actual trial of a malpractice case from a defense lawyer's perspective representing a CRNA. Include the purpose of an opening statement, benefits of demonstrative evidence and burden of proof issues and the CRNA's live testimony.

Overall rating of topic and facilitator during this lecture.

Lecture 11 - *, * Optimizing Perioperative Ventilation: Strategies & Tips - K. Westra**

List the pros and cons of various modes of controlled and spontaneous ventilation.

Operationalize his/her understanding of respiratory physiology and pathophysiology through the appropriate choice of ventilatory therapy.

Articulate three methods of lung recruitment and defend rationales for each while exhibiting an understanding of the importance of employing these strategies during general anesthesia.

Overall rating of topic and facilitator during this lecture.

Lecture 12 - */*CRNA as an Expert Witness - K. Miller

Discuss the individual requirements necessary to qualify as an expert witness

Overall rating of topic and facilitator during this lecture.

Lecture 13 - The Surgical Home Model: A Possible Paradigm Shift to the Care of the Surgical Patient - C. Frederick

Describe the potential reimbursement changes coming to healthcare (ACOs).

Describe the importance of improved inter-professional relationships and teamwork in healthcare.

Describe the concept of the Perioperative Surgical Home and discuss its potential benefits.

Overall rating of topic and facilitator during this lecture.

Lecture 14 - *Peri-Operative Visual Loss - C. Frederick**

Describe the occurrence and types of POVL.

Identify patient and procedure specific risk factors for POVL.

Discuss current best practices to minimize the risk of POVL.

Overall rating of topic and facilitator during this lecture.

Rate on the following scale: 5 = excellent, 4 = Above Average, 3 = Average, 2 = Below Average, 1 = Poor

5 to 1

Lecture 15 - *, **, *Surviving Anesthesia Perils: Acute Perioperative Crisis Management - K. Westra**

List the fundamental critical resource management element required to successfully manage a perioperative clinical crisis.

Describe the anesthesia care and treatment required for perioperative myocardial infarction, malignant hyperthermia, acute intraoperative hemorrhage, anaphylactic reaction.

State the importance of effective team dynamics, closed loop communication, and emergency preparedness in effectively treating acute perioperative clinical crisis's.

Overall rating of topic and facilitator during this lecture.

Lecture 16 - */*The New Paradigm in Anesthesia: A Business Practice Model - K. Westra

Describe the impact of Anesthesia Management Companies on anesthesia practice, quality, and safety.

List three models of anesthesia business and their impact on anesthesia care delivery.

State the importance of the "Lean" Process" and emerging trends in anesthesia business management.

Overall rating of topic and facilitator during this lecture.

Lecture 17 - **, *, ****EKG/Arrhythmia Review - K. Westra**

Dissect a cardiac cycle on EKG in segments and intervals while identifying appropriate coincident timeframes.

List and recognize various arrhythmias of focal origin.

Describe the pathophysiology of heart blocks and articulate an understanding of their differences.

State the steps of basic 12-lead EKG interpretation.

Overall rating of topic and facilitator during this lecture.

Lecture 18 - **New Drugs: What the Anesthesia Provider Should Know - C. Frederick

Name four categories of recently approved novel drugs that are new to patient care.

Describe the unique mechanisms of action of these drugs.

Discuss the impact these new drugs may have on anesthetic care.

Overall rating of topic and facilitator during this lecture.

Lecture 19 - **Lidocaine: More than a Regional Anesthetic - C. Frederick

Describe the physiologic mechanism by which local anesthetics exert an anti-inflammatory affect.

Discuss research evidence for its efficacy.

Describe the systemic local anesthetic use as part of a multimodal pain plan.

Overall rating of topic and facilitator during this lecture.

Lecture 20 - *, **, *Obesity and Obstructive Sleep Apnea - K. Westra**

List causative factors of Obstructive Sleep Apnea.

Describe physiological changes associated with Obstructive Sleep Apnea.

Outline anesthetic safety parameters specific to this patient population.

Overall rating of topic and facilitator during this lecture.

Rate on the following scale: 5 = excellent, 4 = Above Average, 3 = Average, 2 = Below Average, 1 = Poor

5 to 1

Lecture 21 - */Anesthesia & AIDS - K. Westra**

List the systemic effects of AIDS and implications for anesthesia care for general, regional anesthesia, and monitored anesthesia care.

Describe the risk and benefits of general anesthesia, regional anesthesia, and Monitored anesthesia care.

Define the importance of coordination of immunological laboratory markers on the anesthesia care plan.

Overall rating of topic and facilitator during this lecture.

Relevancy to Core Modules Domains per the 2016-2017 required Class A CE Credits:

*Airway **Pharmacology ***Physiology/Pathophysiology ****Anesthesia Technology
 / Legal Issues */** HIV

Overall Assessment

Rate on the following scale: 5 being excellent – 1 being poor

5 to 1

The facilitators were effective in presenting the material.

--

Teaching methods were effective.

--

The program content was related to the objectives.

--

My personal learning objectives were met.

--

Physical facilities facilitated learning.

--

State one item you learned that will improve your nurse anesthesia practice.

State any barriers to implement this change.

What future topics would you like presented?
